“ . . . to encourage and empower a generation of orphans,
one village at a time.

PLEASE HELP SAVE LIVES! DONATE TODAY AND HELP US FINISH HOME AGAIN MEDICAL CLINIC BY JUNE!

What would you do if you could not get medical help for your child . . . is there anything that would make you feel more powerless? The children in Kaihura, Uganda live a 45-minute car ride from the nearest medical facility - it might as well be 450 miles. Ninety-nine percent of the community has no transportation. Children die every day from curable illnesses and injuries because they do not have access to medical facilities.

Embrace Uganda and our Ugandan partner, Bringing Hope to the Family, are working together to build a Level III Medical Clinic in Kaihura. The Hope Again Medical Clinic will serve not only the village of Kaihura but the entire district of Kyenjojo. In Kyenjojo, there are approximately 450,000 people and two (2) practicing physicians. Contrast that to America which averages one (1) physician per 276 people and the discrepancy becomes very clear!

The clinic will provide primary care services to the general population but will also allow HIV AIDS care to be provided on-site. In addition, it will make a vaccination program possible and expand diagnostic capabilities for diseases such as malaria and TB. The clinic will also provide maternity care for high-risk deliveries under medical supervision as opposed to delivering in remote homes. We also hope to attract full-time physician staffing to this area that would be impossible without proper facilities.

The community of Kaihura is hard at work and the building has begun! And this is not the American type of building . . . another mental image for comparison . . . imagine that in order to build you had to carry jugs of water weighing 50+ pounds 3/4 of a mile, mix cement by hand, dig with hoes and shovels instead of backhoes, measure and level with string . . . Our Ugandan friends work hard if you invest in them!

Click this link to watch an incredible video of the first two phases being built!

We need your help to save these beautiful children!! Generous donors have helped Embrace Uganda build the first two phases of the clinic. If we can raise the final \$50,000 we will be able to finish the clinic and start saving lives!

Every \$1 makes a difference—Please give now!
